Mae'r strategaeth ddrafft hon yn rhoi trywydd i'w ddilyn. Mae'n adlewyrchu gofynion deddfwriaethol, ac yn cefnogi'r dadansoddiad o anghenion y boblogaeth ar gyfer Gorllewin Cymru. Amgaeir y strategaeth ddrafft a gwahoddir y Pwyllgor Craffu i ystyried a chyflwyno sylwadau ar y drafft a fydd yn destun proses ymgynghori ffurfiol.

Wrth ddatblygu'r strategaeth ddrafft hyd yn hyn, mae Sir Gaerfyrddin eisoes wedi gwneud gwaith ymgysylltu o fewn ei gwasanaethau dydd a oedd yn cynnwys defnyddwyr gwasanaethau a rhieni/gofalwyr. EXECUTIVE SUMMARY
SOCIAL CARE & HEALTH SCRUTINY COMMITTEE
DATE: 19TH APRIL, 2018

SUBJECT:
DRAFT LEARNING DISABILITY STRATEGY 2018-2023

The Social Services and Well-being (Wales) Act 2014 came into force in April 2016. It reforms and integrates social services law and emphasises improving wellbeing outcomes for people who need care and support, including carers. It introduces a common set of processes to ensure people receive the right support at the right time, strengthens collaboration and the integration of services, and provides for an increased focus on prevention and early intervention.

The Act fundamentally changes the way in which care and support services are delivered in Wales and is based on a number of principles:

- Voice and control- putting the individual and their needs at the centre of their care, and giving them a voice in and control over reaching the outcomes that help them achieve well-being
- Prevention and early intervention-increasing preventative service with the community to reduce the need for on-going managed care
- Wellbeing- supporting people to achieve their own well-being and measuring the success of care and support
- Co-production- encouraging individuals to become more involved in the design and delivery of services.

The draft Learning Disability Strategy for Carmarthenshire embraces the principles of the Act and incorporates previous engagement undertaken with service users, carers/ parents and others. The draft Strategy will be subject to formal consultation.

Regional partners have previously developed a shared Statement of Intent for Learning Disability Services and Model of Care and Support. Both documents contain clear commitments to improving learning disability services and describes the joined-up approach needed to positively transform services in West Wales.

The West Wales Population Assessment (2017) further committed partners to transforming services in a way that maximises independence and the potential of those using services.

A Regional Learning Disabilities Programme Board has been established to address the issues identified within the Population Assessment, meet the national requirements outlined above and lead the transformation of learning disabilities service across health and social care. The work of the Board is based on a shared vision to develop an integrated model of care for people with learning disabilities, their families and their carers right across the region. It draws upon models being implemented through local Learning Disabilities strategies in each of the County areas

The Carmarthenshire Strategy will ensure within the national and regional context the local voice of people who use and need services is captured and the landscape of local services developed to reflect this.

1. Policy, Crime & Disorder and Equalities

The Well-being of Future Generations (Wales) Act 2015 places further emphasis on planning for the future, joint working across public service organisations, and working better and more closely with people and communities.

Key outcome areas within the strategy are as follows:

- To improve community resilience and enablement through choice, self- direction and control over decisions that effects the lives of people with a learning disability in line with the Social Services and Well-being Act.
- Imported quality of life through improved choice for housing and accommodation for people with a learning disability, with majority being the same as for other people in the community.
- People with a learning disability, if given more opportunities for personal development and life experiences would have improved well-being and a better quality of life.
- The quality of life for people with learning disabilities would be improved when they are given every opportunity to be independent, exercise and enjoy their rights and meet their individual obligations.

An equality impact assessment will be undertaken on the strategy in line with the Council's equality strategy

2. Legal

The Social Services and well-being (Wales) Act 2014 provides the statutory framework for improving the well- being outcomes of adults and children who need care and support and carers who need support. It has a particular focus on voice and control so people have control over their own care and support and can make decisions about it as an equal partner.

3.Finance

This strategy is Carmarthenshire's commitment to support people with learning disabilities and incorporates services and activities provided and delivered through partner organisations including the voluntary sector, community groups and health.

Budgetary pressures will be a key challenge during the life time of the strategy. These pressures make it even more important for Carmarthenshire to have a clear strategic plan.

The resources required to implement this strategy will come from the redirection of current resources as services are modernised, and from the Integrated Care Fund which supports innovation and the transformation of services.

5. Risk Management Issues

Those who use services and their carers have raised concerns regarding the potential risks of compromising current services as new service models are developed.
