#### 7.0 Project Officer's comments

- Applicant is looking to install a 60kWh system along with a 10kWh battery storage system which is expected to reduce bills by 60-70% whilst saving over 10 tonnes of carbon equivalent per year
- The applicant has chosen to go with the 2<sup>nd</sup> lowest price due to the cheapest not meeting the minimum specification of 60kWh; the difference in cost between the two quotes is £1362.42. A grant of £25,000 towards total eligible costs has been requested – This represents a grant of 44.126%.
- The applicant has provided confirmation of match funding via a bank statement to show they have circa 20k in the business bank account, whilst having approx. 30k available on the business credit card to get application through panel; However the applicant will replace this with a Carmarthenshire Energy loan as soon as the loan is open ;
- A planning application has been submitted for a certificate of lawful development with the decision outstanding, building regulations will also need to be confirmed
- The applicant has obtained consent from the leasehold owner – however permission may be required from the landowner (WG)
- Microgeneration Certification Scheme (MCS) and building regs will not cover systems over 50kWh; for systems over 50kWh there is an accreditation process called ROO-FIT has been set up by Ofgem for which the installer should be accredited to
