A. The new law states that we must carry out sustainable development, improving the economic, social, environmental and cultural well-being of Wales. **The sustainable development principle** is

“... the public body must act in a manner which seeks to ensure that the needs of the present are met without compromising the ability of future generations to meet their own needs.”

B. To show that we have applied the sustainable development principle we must demonstrate the following **5 ways of working** :-

Looking at the **long term** so that we do not compromise the ability of future generations to meet their own needs

Understanding the root causes of the issues to **prevent** them reoccurring

Taking an **integrated** approach so that we look at all well-being goals and objectives of other services and partners

Collaboration - Working with others in a collaborative way to find shared sustainable solutions

Involving a diversity of population in decisions that affect them

C.

Well-being Goals

There are **7 well-being goals** in the Act. Together they provide a shared vision for public bodies to work towards. We must work towards achieving all of them.
